

Les objets identiques: - Notion de position.  
- Notion de latéralité.

Trouve l'objet identique et placé de la même façon que le modèle.

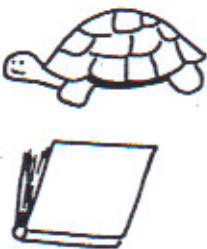

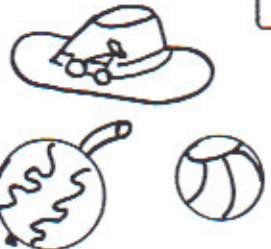

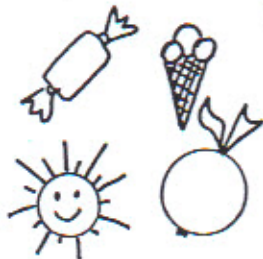

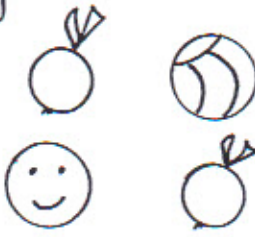

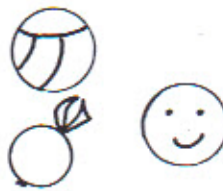

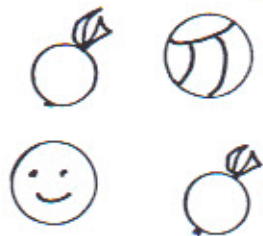

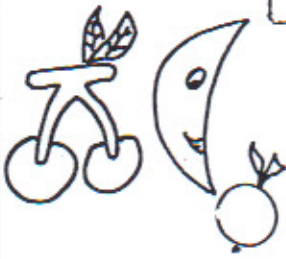

|    |                                                                                     |                                                                                     |                                                                                       |                                                                                       |
